## ANTIVIRUS 2008

Advanced Proactive Protection from Viruses, Spyware, and More...

### Proactive Protection from

- **Malware (Viruses, Trojans, Worms, and other threats)**  
BitDefender actively protects your PC from all types of malicious code. Web traffic is filtered even before reaching your browser, for a safe and enjoyable web experience. Messaging and peer-to-peer applications are also monitored to help prevent viruses from spreading.
- **Spyware and Adware**  
Based on a comprehensive spyware signature database, BitDefender blocks spyware threats in real-time, before they can damage your system. It also monitors dozens of potential "hotspots" where spyware might act, and checks for any changes made to your system and software.

- **Unknown Viruses**  
BitDefender has developed B-HAVE (Behavioral Heuristic Analyzer in Virtual Environments), a new technology designed to detect and block new and unknown threats without the need for an update. By analyzing the behavior of potentially malicious software inside a virtual computer, this technology eliminates false positives and significantly increases detection rates.
- **Hidden Threats (Rootkits)**  
BitDefender looks for and removes rootkits, malicious programs designed to control your computer, while staying hidden.
- **Phishing Attacks**  
Blocks malicious websites trying to trick you into revealing personal information, such as financial data.

#### Hassle – Free Hourly Updates

Hourly updates ensure that you are protected against the latest threats without pushing a button. Lost program files are not a problem either. In the rare event of file damage due to PC problems, BitDefender automatically repairs and updates itself.

#### FREE 24/7 Support

Got a question? Our security experts are available to help you 24/7 via phone, email or chat at no additional cost.

Using state-of-the-art malware detection technology, BitDefender provides superior proactive protection against new and unknown viruses, without the need for signature updates.

According to [av-comparatives.org](http://av-comparatives.org), June 2007  
Heuristic detection with three month-old signatures.

#### New Gamer Mode

The new Gamer Mode temporarily modifies protection settings so as to minimize their impact on gaming performance, maintaining a safe, fun gaming experience.

#### System Requirements:

- Windows 2000 with SP 4
- Windows XP with SP 2 (32/64 bit)
- Windows Vista (32/64 bit)
