

BitDefender Mobile Security

www.bitdefender.com

Antivirus for Smartphones and PDAs

BitDefender Mobile Security provides permanent antivirus protection for mobile devices running Symbian™ or Microsoft® Windows Mobile™. Relying on the valuable BitDefender experience in fighting computer threats, BitDefender Mobile Security is a light, easy to use instrument that will keep your mobile device on the move.

Features

Permanent antivirus protection

The virus shield runs at start up and continuously monitors the device, preventing the transfer or execution of infected files.

On-demand virus scan

Using the award-winning BitDefender technologies, the product can check the internal memory, memory card or the entire device, removing the malicious files found. The scanning engines are also capable of detecting infected files within common archive types.

Fast, flexible updates

The product can be updated either via GPRS from the service provider or from an internet-connected PC. The virus definitions updates are provided by the BitDefender Lab, an industry leader in terms of response time to virus outbreaks.

Engineered for mobility

Optimized scanning processes provide permanent protection while minimizing resource consumption for a longer battery life.

Easy to install and to use

The product can be installed directly to the mobile device, via a mobile Internet connection or via the PC application. The interface is simple and friendly and no user intervention is required while the product is running.

Professional technical support

Offered online by qualified support representatives and by accessing an online database with answers to Frequently Asked Questions.

Key Benefits:

- Permanent antivirus protection
- On-demand scan and virus removal
- Low resources consumption
- Fast updates through GPRS or via PC
- Easy to install and to use
