

From Detection to Action: How EclecticIQ Enriches Threat Intelligence with Bitdefender's Insights

A global threat intelligence leader, EclecticIQ empowers security teams with dynamic, collaborative solutions that simplify detection, accelerate response, and neutralize critical cyber threats.

- ▶ **Industry:** Cybersecurity Services Provider
- ▶ **Employees:** 70+
- ▶ **Headquarters:** Amsterdam, North Holland

*"During a targeted ransomware campaign, Bitdefender identified a suspicious file as part of a known variant. It was sandboxed, confirmed malicious, and IOCs were deployed to our endpoints within minutes, **stopping the attack before encryption even began.**"*

JOERG ABRAHAM,
Principal Product Manager, EclecticIQ

Lower Downtime

With enriched malware sandbox reports and forensic data, security teams improved response times and minimized downtime.

More Clients

Bitdefender threat intelligence differentiates EclecticIQ's Threat Intelligence Platform (TIP) with enhanced security operations.

Lower Costs

Automating Bitdefender intelligence ingestion reduces manual effort, lowering threat intelligence management costs.

Business Objectives:

- ✓ **Cut development costs and complexity** by licensing advanced cybersecurity features instead of building them from scratch.
- ✓ **Integrate threat intelligence and malware sandbox analysis technology** with existing stacks using licensed tools that support standards and ensure compliance.
- ✓ **Embed licensed cybersecurity tools that offer secure scalability and evolve** alongside customers' business and threat landscape.

Our Solution:

Bitdefender's **continuously updated threat intelligence feeds** help EclecticIQ stay ahead of evolving threats with rapid distribution to SOC teams and integration with SIEM/SOAR tools for automated response.

Bitdefender's flexible, well-documented APIs empower EclecticIQ's teams to **tailor workflows and automate deep data correlation**, driving precise, rapid response to threats within customer environments.

Bitdefender's AI-powered sandbox offers advanced malware analysis capabilities inside EclecticIQ's TIP, **automatically extracting IOCs, enriching threat intelligence, and triggering blocking actions** across integrated security controls.

Results:

Threat intelligence gives analysts the context to **investigate faster and respond decisively** — no guesswork, just action.

Bitdefender's sandbox identifies malicious behavior in suspicious files from the user's infrastructure, **enabling immediate classification and response** before damage spreads.

Incident reports are generated and shared within minutes, **enabling security teams to begin remediation and root cause analysis in minutes.**
