GravityZone Proactive Hardening and Attack Surface Reduction (PHASR) for MSPs

Fortify your managed organizations' security posture with PHASR

PHASR is a groundbreaking hardening solution that proactively delivers personalized and dynamic attack surface reduction by restricting access to system management and scripting tools. This enables MSPs to effectively block modern attacks, including Living off the Land (LotL) techniques, at their earliest stages.

PHASR Key Outcomes for MSPs

- **Context-aware, Behavior-based Hardening** - Deliver tailored, adaptive security to your customers with PHASR, automatically analyzing user behaviors and dynamically restricting risky applications and unusual activities to significantly reduce vulnerabilities without impacting user productivity.

- **Dynamic, Autonomous Attack Surface Reduction** - Significantly reduce administrative overhead and strengthen customer defenses with PHASR Autopilot mode, which enables adaptive and autonomous attack surface adjustments in real time by proactively responding to user behavior changes and emerging threat vectors without manual intervention.

- **Integrated Intelligence-driven Security** - Effortlessly protect managed customers with PHASR's proactive defense powered by Bitdefender threat intelligence, efficiently anticipating and blocking emerging threats without additional administrative effort.

- **Unified, Efficient Security Management -** Streamline your security operations with PHASR's seamless integration with the Bitdefender GravityZone MSP Security Suite, providing unified risk visibility, prioritization, mitigation, and comprehensive threat prevention, detection, and response.

DATASHEET

GravityZone Cloud MSP Security Solutions

Power up your portfolio with our advanced, scalable MSP-tailored security solutions and PHASR. Delivering the optimal balance of control, flexibility, and scalability, our solutions provide you with the tools to enhance your customers' defenses against cyber threats. Whether you prefer custom features or a comprehensive package with advanced threat protection, risk-based threat hunting, and proactive services, we have what you need:

- Secure **(EDR)** - Cost-effective, advanced threat detection ensures no risk goes undetected, safeguarding your customers against evolving threats.

- Secure Plus **(MDR)** - Strengthens security with 24/7 expert monitoring, rapid incident response, and proactive threat hunting, for continuous protection.

- Secure Extra **(MXDR)** - Delivers comprehensive protection with extended detection and response (XDR), covering endpoints, identity management, and productivity applications for complete security.

Features	Secure (EDR)	Secure Plus (MDR)	Secure Extra (MXDR)
Endpoint Risk Analytics	✓	✓	✓
Ransomware Mitigation & Rollback	✓	✓	✓
Advanced Threat Control	✓	✓	✓
Web Threat Protection	✓	✓	✓
Application Control (Blacklisting)	✓	✓	✓
Firewall & Device Control	✓	✓	✓
Advanced Anti-Exploit	✓	✓	✓
Automatic Disinfection and Removal	✓	✓	✓
Network Attack Defense	✓	✓	✓
Fileless Attack Protection	✓	✓	✓
HyperDetect™ (Tunable Machine Learning)	✓	✓	✓
Sandbox Analyzer	✓	✓	✓
Incident Visualization	✓	✓	✓
MITRE Event Tagging	✓	✓	✓
Managed Detection and Response	–	✓	✓
24/7 Security Operations Center	–	✓	✓
Incident Root Cause & Impact Analysis	–	✓	✓
Threat Hunting & Threat Management	–	✓	✓
Monthly MDR Service Report	–	✓	✓
Extended Detection and Response (XDR) Identity	+	+	✓
Extended Detection and Response (XDR) Productivity	+	+	✓
Extended Detection and Response (XDR) Network	+	+	+
Extended Detection and Response (XDR) Cloud	+	+	+
EDR Data Retention (90 days / 180 days / 365 days)	+	+	+
Compliance Manager	+	+	+
External Attack Surface Management	+	+	+
Proactive Hardening and Attack Surface Reduction	+	+	+
