DATASHEET

Managed Detection and Response for MSPs

### Bitdefender MDR for MSPs (MDR Foundations) provides MSPs customers with enterprise-grade security that is easy to deploy and consume.

MDR analysts note that over 80% of customer inquiries that begin with end point protection (EPP) or endpoint detection and response (EDR), end up in a conversation about managed detection and response (MDR). That's because Bitdefender MDR directly addresses your customer's single greatest security need – people. Access to security technologies has never been a barrier, but hiring, training, and retaining security professionals to manage those technologies has never been more challenging – or expensive.

#### **MSP Benefits**

- Revenue growth MDR service provides additional revenue opportunities and more stickiness with your customers.
- Automated billing provides a streamlined experience for MSPs and customers alike.
- Streamlined onboarding allows for sequential onboarding of multiple customers in a straightforward, repeatable process.
- Communications multiple means of communications and notifications supports customer level interactions

### **Customer Benefits**

- 4 24x7 security coverage Our global network of SOCs work when you work and cover you around the world and around the clock. If a security incident occurs, our SOC will take action and a security account manager will call your emergency contact within 30 minutes.
- Pre-Approved Actions (PAA) A comprehensive array of PAAs provide quick and decisive response actions to mitigate security incidents. Our analysts evaluate, investigate and take actions faster than any teams.
- 5 Threat Hunting Hundreds of millions of total covered endpoints allows Bitdefender to compile a massive amount of threat intelligence, attacker research and threat analyses to support threat hunts and continuously update and protect your customers
- MDR Portal & Reporting Your MDR portal provides dashboards and monthly, actionable reporting on your customers' service.

#### At-a-Glance

Bitdefender MDR delivers the people, process, and technology to completely address your security needs and outcomes. Modern EDR/XDR solutions require skilled analysts to continually monitor the environment, with an ever-increasing number of alerts, and ownership of timecritical response workflows. Bitdefender MDR takes responsibility for these challenges so that your IT and Security teams can focus on helping your organization grow.

#### **Key Benefits**

- Analysis, not alerts Bitdefender MDR service manages the entire alert lifecycle, analyzing thousands of alerts down to a handful of responses and recommendations. See everything transparently in your MDR portal and get notified of only what matters to you.
- Quick, decisive response Our security analysts quickly assess security incidents and take decisive actions to contain and mitigate threats, leveraging a comprehensive array of pre-approved actions.
- Best-in-class security platform Bitdefender MDR service includes our industry-leading security platform, consistently placing #1 in independent tests by MITRE, AV TEST, and AV Comparatives. Moreover, Bitdefender owns the platform, giving our customers one security technology stack to consolidate on.
