DATASHEET

# GravityZone Cloud MSP Security

### An effective cybersecurity solution for MSPs with advanced prevention, security hardening, detection, and response

Complex ransomware attacks, data breaches, and an escalation in phishing attacks can easily bypass most antivirus software, constituting a threat to service providers and their customers' businesses. This risk is even more pronounced as now IT and security leaders are facing diverse challenges in extending security capabilities across multiple environments. Bitdefender GravityZone Cloud MSP Security offers a unified and robust cybersecurity solution, outperforming other Next-Gen and Endpoint Detection and Response products in protecting against advanced threat actors.

# **Unified, Comprehensive Security**

GravityZone Cloud MSP Security is a complete security package tailor-made for Managed Service Providers. Using the most comprehensive technology for prevention and hardening, GravityZone Cloud MSP Security automatically blocks advanced threats at pre-execution, drastically reducing manual detection and response efforts. It employs a broad spectrum of built-in and optional technologies, enhanced by machine learning and behavioural analysis, to deliver robust protection against advanced cyber-attacks.

#### At-a-Glance

Designed specifically for Managed Service Providers, Bitdefender GravityZone Cloud MSP Security minimizes security and operational overhead and maximizes profits with a single platform to manage prevention, security hardening, detection, and response for all customers with monthly usagebased licensing.

#### **Key Benefits**

- → MOST EFFECTIVE PROTECTION - Ranked 1st consistently and across different tests, e.g. AV-Comparatives APT tests and MITRE ATT&CK
- → UNIFIFIED, PROACTIVE AND INTEGRATED MANAGAMENT - Easy to deploy via a multitenant single dashboard console that gives a clear picture of incident response and risk across networks and endpoints with extensive APIs and more RMM integration.
- → PROFITABILITY AND VENDOR CONSOLIDATION - More effective security and core abilities with add-on layers in conjunction with aggregated price tiers, flexible licensing, and competitive pricing.
